

# Roxtec GH framekits

Roxtec GH framekit is a solution for bolting including a GH frame, a sealing strip and an extension frame for channelization. The GH FL100 frame kit with wider flange is used when bolting onto a brick or concrete wall. Modules, stayplates and a compression unit are added for a complete transit.

- To be used with corresponding Roxtec components to form a complete sealing solution
- Attachment by bolting to steel or sandwich walls
- The GH FL100 framekits are used when bolting to concrete or brick
